Registration
All the interested participants are requested to register by communicating –

Prof Rlauf Iqbal – raufiqbal@nitie.edu / rauf.nitie@gmail.com
Convenor – Workshop on Industrial Safety and Human Factors,
Room No 211, 2nd Floor, Training Block,
NITIE, MUMBAI – 400 087, INDIA

The registration will be confirmed by the organisers and communicated to you. You can also register at the following link:
www.nitie.edu

Registration Fees
All delegates are requested to register and pay the registration fees through DD payable on “NITIE, Mumbai” with details of Name, Affiliation etc.

Industry Delegate : ₹ 2000/-
Academic Delegate
Faculty : ₹ 1200/-
Student : ₹ 800/-

The workshop is non-residential. Registration fee includes Registration kit, tea, lunch and certificate.

Steering Committee
Prof. (Ms.) Karuna Jain, Director, NITIE
Prof. H. V. Bhasin
Prof. Ashok K. Pundir
Prof. Seema Unnikrishnan
Prof. Rauf Iqbal

Organising Committee
Prof. Shankar Murthy
Prof. Rauf Iqbal
Prof. Vivek Khanzode
Prof. Hema Diwan

How to Reach NITIE
Road distance of NITIE from different locations in Mumbai are
(You can reach by taxi or auto):

Airports:
Domestic Airport: 13 km  International Airport: 9 km

Railway Stations:
CST: 29 km, Dadar: 21 km, LTT Kurla: 13 km, Vikhroli: 10 km,
Kanjurmarg: 9 km, Thane: 18 km
Mumbai Central: 24 km, Bandra (T): 18 km, Andheri: 11 km,
Borivali: 18 km

Accommodation
Limited accommodation is available on NITIE premises
(MDP Hostel) on request @ ₹ 400/- per day per person.

WORKSHOP ON
INDUSTRIAL SAFETY &
HUMAN FACTORS

Challenges and Opportunities

organised by
NITIE, Mumbai

on
10th MARCH 2014

National Institute of Industrial Engineering
Vihar Lake, Mumbai - 400 087
Industrial Safety and Human Factors

Occupational Safety and Health (OSH) is an area concerned with protecting the safety, health and welfare of people engaged in work or employment. The goals of occupational safety and health programs include to foster a safe and healthy work environment. Organisations are liable to ensure that employees and any other persons who may be affected by the companies undertaking remain safe at all times. Recent decades have seen changes in our attitude towards industrial safety. Indian industries are now more concerned for the safety and health of their employees which in turn is reciprocated into productivity.

Safety plays an important role in manufacturing as well as process facilities to ensure the company is maintaining the highest levels of output. Without safety as a top priority we are sure to experience delays in getting the product finished and shipped to the customer, thus impacting the company’s bottom line.

Safety at work depends upon the interaction between people and machines and the factors that affect the interaction. The purpose of human factors is to improve the performance of systems by improving human-machine interaction. This is done by “designing in” a better interface, or by “designing out” factors at work environment, or work organization that degrade human machine performance.

The Event

This workshop aims at bringing the practitioners together on a forum along with the experts in Industrial Safety and Human Factors to discuss the issues and challenges in this field. The delegates will be able to understand the best practices and tools to effectively handle safety and human factor issues in industry.

The expected participants for the workshop are typically practitioners and executives (middle and top level) in the areas of safety, ergonomics, manufacturing, operations and maintenance. We are also looking for a select number of delegates from academia comprising faculty and research scholars working in the area of industrial safety and human factors. Some of the challenges could be taken as joint research projects with the concerned industry.

Eminent personalities from industry and academia will be invited as speakers. Speakers on industrial safety will be the senior level practicing professionals while the speaker on human factors will be drawn from academia.

About NITIE

National Institute of Industrial Engineering (NITIE) is a premier academic institute of higher learning established in 1963. NITIE has travelled a long way in its endeavor to reach excellence in various aspects of Industrial Engineering. It has been providing solutions for problems in the areas of Industrial Engineering, Operations Management, Environment Management and Information Technology Management, covering the Human-Machine interface, enhancing the productivity and contributing towards the organizational development of private, public & government of and society at large. NITIE in its 50th year wishes to give focussed attention to manufacturing sector through its knowledge and expertise. As part of its Golden Jubilee celebration NITIE wishes to conduct a one day workshop on Industrial Safety and Human Factors with the practice leaders from Industry and academia.
